VINYL CUTTER C IV SERIES

Secabo's C IV series vinyl cutters are a consistent further development of the popular C III vinyl cutter series. Thanks to the improved cutting quality, increased reliability and a higher level of accuracy, it can be used in almost all professional areas of the sign-making industry. All common materials, such as adhesive films, self-adhesive films, flock and flex films, stencil films, paper, cardboard, etc. can be processed.

The large backlit display and large buttons allow for easy operation of the vinyl cutter, while the improved LAPOS technology allows for precise cutting of the printed films. The vinyl cutters are comfortably controlled using the cutting software DrawCut LITE included in the delivery. A stable stand with a roll mount is optionally available for C60 IV and included with the C120 IV.

DrawCut LITE cutting software – standard on board!

The multilingual cutting software DrawCut LITE for Windows is included in the scope of delivery. DrawCut LITE not only reliably handles design and layout tasks and imports a wealth of graphic file formats, but also steers the Print&Cut applications of LAPOS 2, DrawCut LITE has many powerful text tools, vector functions, plotting and weeding tools and is therefore the ideal cutting software for quickly achieving professional plotting results with little training.

Stable stand with roll holder - because order is essential

A stable stand is also included (except C30IV and C60IV). The roll holder makes working particularly fun: film rolls are unwound smoothly and jolt-free, thus ensuring high precision even with long plots.

Upgrade to DrawCut PRO available

You can upgrade from the supplied version of the DrawCut LITE cutting software to PRO at any time. DrawCut PRO's advanced design and layout tools will make your work easier and faster, while the vectorisation function will open new doors for you.

ACCESSORIES VINYL CUTTER

Drag knife

For all Secabo vinyl cutters, carbide, cutting angles from 30°, 45° or 60° - depending on the application area, offset 0.25mm.

Plot surfaces

Easily self-adhesing, can even be used with very thin and fragile films. Available in A4, A3 and 60cm x 90cm.

Blade holder

For all current and all older models, ball-bearing aluminum blade holder, blade immersion depth can be set via an adjusting screw, comfortable ejecting by a spring pin.

Stand

For C60IV, S60 and T60. Stand with roll mount, rollers can be set to different grids, stable rubber feet. A protective conductor connection prevents electrostatic charging of the film.

Catch-up basket

For all current and all older models. Ideal protection of media against dirt, dust, static charges and, at the same time, a practical container for falling film waste.

SignCut

Efficient cutting software for MAC OS and Windows. SignCut supports you during the entire production process SignCut Pro is always up to date, compatible with all Corel Draw and Adobe Illustrator versions. No LAPOS support.

TECHNICAL DATA

	C30IV	C60IV	C120IV
Max. Media width	420mm	630mm	1260mm
Max. Cutting width	330mm	720mm	1350mm
Max. Media thickness		1mm	
Min. Media width		50mm	
Repetition accuracy		< ± 0.1mm	
Repetition accuracy		600mm/s	
Max. Contact pressure		500g	
Mechanical resolution		0.025mm	
Environment	+5°C - +35°C / 30% - 70% relative humidity		
Connections	serial, USB		
Weight without packaging	9kg	12kg	25kg
Contour cut function	LAPOS, 4 crop marks		
Items included	Knife holder, drag knife, DIN A4 plot surface, plot pen, connection cable, software, user manual
